

BICOALGAE® ω3: PRO-RESOLVING SKIN INFLAMMAGING

BICOALGAE® ω3 is a SKIN SUPERFOOD that incorporates two microalgae extracts (*Nannochloropsis gaditana* and *Isochrysis galbana*), rich EPA and DHA ω3 fatty acids.

N. gaditana - rich source of ω3 - EPA

I. galbana - rich source of ω3 - DHA

BICOALGAE® ω3 mechanism to decrease skin inflammaging is based on three key points:

- Incorporation and stabilisation of microalgae bioactives
- Deliver of microalgae bioactive in the epidermal layers so they can trigger endogenous healing processes
 - Reinforcement of skin lipid microstructure
