CLOSE TO OUR PARTNERS

Small batches production and new product development we accompany our partners in the development and growth of their products in the nutraceutical market.

CONSULTING AND REGULATION

We provide all the necessary support to register nutraceutical products at national and international level, in compliance with local regulations.

Research and development

Thanks to our controlled and certified raw material portfolio, we provide innovative and exclusive formulations that meet our customers needs, ensuring maximum flexibility and high-quality standards.

GRAPHICS & PACKAGING

Our team of experts can support the packaging and graphic realization or restyling. According to the latest regulations and marketing targets we create the most effective packaging. We customize the line of products according to our customer's ideas and market trends.

LOGISTICS & WAREHOUSE

Our logistics team supports the management of the shipment of the products to reach their final destination without any obstacle. We also offer the warehousing service, free of charge in order to support our partners having the most competitive price and prompt availability.
